(54) METHOD FOR CLEANING SEPARATION MEMBRANE MODULE

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a method for cleaning a separation membrane module which can clean with a small amount of chemical liquid without moving the module in a method in which the separation membrane module is immersed in a tank for liquid to be treated and sucked from the filtrate side, liquid to be treated is filtered, and the clogged module is cleaned by the filtrate.

SOLUTION: In a filter in which a separation membrane module 4 is immersed in a tank 2 for liquid to be treated and sucked from the filtrate side, and the filtrate is filtered, after the liquid to be treated in the tank 2 being discharged, chemical liquid is passed from the filtrate side of the module 4 to clean the module.
